

Acteev[®]

Permanent, sustainable anti-odor nylon fibers and yarns

Acteev offers permanent antimicrobial, anti-odor protection. Its power comes from ionic zinc, a natural mineral required by the human body. The zinc is embedded during the polymerization process and not added as a post-production treatment or coating. One of the strongest polymers in the industry - nylon 6,6 - Acteev yarns are built to last and are not disposable or quick to hit the landfill. Available as a carbon-neutral offering, Acteev was the winner of the 2021 Outdoor Retailer Innovation Award and is protected by more than 100 patents globally.

Features

- **Anti-odor**
- **Abrasion-resistant and durable**
